Food & Health Webinar series: How safe is your food packaging?

Steps for ensuring safety and conformity to European Legislations

Food packaging must comply with changing market needs and its final use while ensuring safety and technological suitability. Manufacturers and food factories must also seek worldwide acceptance of their food packaging products and materials. Currently, the most used material in packaging is plastic and paper.

In this 1 hour webinar, we will highlight the main contaminants and the relevant European legislations on plastic and paper. We will also address the risk assessment necessary to verify the conformity of your product packaging.

Use this opportunity to also ask the expert any questions you may have on the safety and quality of food packaging products.

Who should attend:
• Manufacturers of plastic & paper packaging products
• Customers of packaging products

Join us on 30th September 2016! Click on the options below to register and receive the meeting login details.

Date: 30th September 2016, Wednesday
Time: Webinar will be conducted in 2 different time zones. Please select to register your preferred time slot
• Register for Session 1: 10am CET/ 4pm SGT
• Register for Session 2: 2pm CET/ 6pm SGT

Expert Profile: Dr. Marinella Vitulli, Laboratory Manager, PhD Lab, a member of TÜV SÜD.

Dr. Vitulli has over 15 years of experience in the field of analytical services and food safety. She started her career at Pisa University as a researcher on food and pharmaceutical chemistry and subsequently moved to various roles in quality control, R&D, and laboratory management. In her current role, she is responsible for coordinating laboratory activity, development of technical services and testing of food, food contact, consumer products and environmental samples.

Dr. Vitulli obtained a PhD in Pharmaceutical Chemistry and Technology from the Pisa University. She is a member of professional associations like the Professional Association ofChemists "Albo dei Chimici" and the Italian Professional Association AIBO – Food Contact Expert (matricola 0335). She is also part of the Italian Packaging Institute technical committee and cooperates with them on trainings and events.

Why should you watch this webinar?
• Gain insights to the possible contaminants for plastics and paper packaging
• Find out the legislations that will impact the export of plastic and paper packaging to Europe
• Learn the steps to verify the conformity of your products
